IN SCIENCE & MATHEMATICS

Summer Ventures isn't your average summer experience. Good thing, because you're not average.

Summer Ventures in Science and Mathematics is a no-cost, state-funded program for academically talented North Carolina students who aspire to careers in science, technology, engineering, and mathematics.

As a rising high school junior or senior, you live on a college campus for four weeks in the summer and conduct research around topics of your interest — while enjoying the company of like-minded peers. Please visit <https://www.ncssm.edu/summerventures> for more information or to apply.

Congratulations to Sydney Bolyard who placed fourth at the Regional Cross Country competition and all TCEC runners who competed at Swannanoa this past Saturday! Sydney will move on to compete in the State Meet at Kernersville this Saturday. Awesome job! #TCECProud!

Are you interested in learning Conversational Russian?

Cost is \$10 per hour. For younger students (elementary age), sessions are one on one. For middle schoolers, sessions will include 1-2 students. High school sessions will consist of 1-4 students. Sessions will meet in the local school or a public library to be announced after the tutor sees where interested students are located, and parents would have to be on site in case of an emergency. Please sign up at the front office by next Thursday, November 9th if you are interested.

Congratulations!

Congratulations to Nina Nicholson whose artwork was chosen for the cover of this year's TCCC Prose Anthology. Payton McKnight and Grace Muraski received honorable mentions for their submissions entitled "Inner Workings" and "Bird in a Gilded Cage", while several other TCEC students' contributions were chosen for inclusion in this compilation of poems and written work. Way to go! #TCECProud!
